**26019 FLO**

# FAQ sheet

## // About Chipco<sup>®</sup> 26019 FLO

### *What is Chipco 26019 FLO?*

Chipco 26019 FLO offers economical, broad-spectrum control of common foliar and soilborne ornamental diseases, including *Botrytis*, leaf spot pathogens and *Rhizoctonia*.

### *What are the key features of Chipco 26019 FLO?*

Chipco 26019 FLO is a cost effective fungicide that is safe to use on all stages of plant development, including plants in bloom. Its unique chemical class makes it a great fit for fungicide rotation.

### *What are the key benefits of Chipco 26019 FLO?*

The low cost-in-use, wide range of labeled plants and high degree of efficacy on key diseases make it ideal for many fungicide programs.

### *What is the active ingredient and the mode of action?*

The active ingredient, iprodione, is in Fungicide Resistance Action Committee (FRAC) Group 2. is the only fungicide in this group.

### *What is the Chipco 26019 FLO formulation?*

Chipco 26019 FLO is a water-based flowable formulation available in 2.5-gallon containers.

## // How To Use Chipco<sup>®</sup> 26019 FLO

### *What diseases does Chipco 26019 FLO control?*

Chipco 26019 FLO provides broad-spectrum activity on diseases including *Botrytis*, *Rhizoctonia*, *Fusarium*, *Alternaria*, *Helminthosporium*, *Bipolaris*\* and *Cylindrocladium*.

### *Where can Chipco 26019 FLO be applied?*

Chipco 26019 FLO can be applied on ornamentals in greenhouses and nurseries.

### *What is the re-entry interval (REI) for Chipco 26019 FLO?*

The REI for Chipco 26019 FLO is 12 hours.

### *What personal protective equipment (PPE) is required when using Chipco 26019 FLO?*

Coveralls, shoes plus socks and chemical-resistant gloves are required.\*\*

## // How Chipco 26019 FLO Works

### *How long will disease control last?*

Chipco 26019 FLO should be applied on a 7-14 day interval until conditions for disease pressure have eased. It should be part of rotational program and cannot be used more than four times per crop cycle.

### *Is Chipco 26019 FLO effective on Botrytis?*

Yes, in fact, Chipco 26019 FLO is considered to be one of the 'go-to' products for *Botrytis* control and should be in spray rotations.

### *Is Chipco 26019 FLO an effective rotation partner?*

Chipco 26019 FLO is the only ornamental fungicide in FRAC Group 2, making it an ideal tank-mix or rotation partner in disease management programs.

### *Can Chipco 26019 FLO be tank-mixed with other fungicides?*

Yes, Chipco 26019 FLO can be mixed with other fungicides, such as Aliette® and Fenstop®, to expand the spectrum of disease control. Follow directions on the label for any tank-mix products.

### *Can I inject Chipco 26019 FLO through my irrigation system?*

Yes, Chipco 26019 FLO can be applied via sprinkler-type irrigation systems.

\*Certain species of *Helminthosporium* have been reclassified as *Bipolaris*

\*\*Additional PPE required for overhead exposure. See label for details.
